

## Course Objectives for N404 Safe Working at Height

It is envisaged that by the end of this course of training the learner will be able to answer questions on and perform the following:

- Have a basic understanding of the industry, the dangers of working in the industry and their responsibilities when working at height
- Be able to define height work and identify the hazards of work above ground level and outline the general requirements necessary to control them
- Be able to identify accident causation in work at height
- Have an appreciation of planning and organisation of work at height
- Set up exclusion zone explaining actions required for emergency actions, identifying any overhead hazards
- Identify and maintain PPE appropriate for safe working at height use
- Demonstrate working at height and explain all safety issues that could arise
